SUMMARY

Frontend Engineer with 4+ years of experience building maintainable web applications using React, TypeScript, and Next.js. Passionate about exploring technologies in depth to deliver efficient, high-quality solutions. Collaborative team player with experience working in cross-functional environments.

EXPERIENCE

Frontend Engineer at OTAKOYI

Aug 2024 - Present

Global IT service provider with 200+ projects

- Developed a B2B e-learning platform with a Next.js/MUI architecture for a leading course provider, achieving a 90%+ satisfaction rate among early users.
- Mentored a team of 2 front-end developers, implementing code standards and contributing to a highly productive and efficient work environment.

Full-Stack Developer at Lumitech

Jul 2023 - Aug 2024

International IT service provider

- Delivered a large-scale CRM system to manage internal products for a leading identity verification platform, using a custom-built, fully accessible UI kit compliant with WCAG and ARIA standards.
- Developed a proof-of-concept finance system for a startup using D3.js, Recharts, and TanStack Table, contributing to successful investment funding.
- Led the development of an AI-based social networking platform, designing the architecture and implementing features such as real-time chat, multi-step forms, and custom UI components.
- Contributed to a real estate CRM monorepo by successfully completing Google's security assessment, preventing vulnerabilities that could expose sensitive user data and source maps.

Full-Stack Mentor at Mate Academy (Part-Time)

Jun 2023 - Aug 2024

Leading Ukrainian EdTech company

- Improved students' technical skills through detailed code reviews and Q&A sessions for front-end and back-end courses, leading to higher job placement rates.
- Prepared students for real-world scenarios by conducting mock technical interviews, improving their confidence and interview skills.

Front-End Developer at DevelopsToday

Jan 2022 - Jun 2023

Global IT service provider

- Independently maintained a React Native finance app, focusing on the successful release of version 2.0, which increased user engagement by 25% and reduced bug reports by 17%.
- Contributed to the development of a digital accounting application using React, React Context, and Bootstrap.
